

The Digital BAREBulb

We have perfected our innovative electronic Slave flash bulb named **The BAREBulb** to a new level to suit the hot digital camera users need. The new name is **The Digital BAREBulb**.

Its electronic circuit is completely new. It incorporates I.C.s to act as a mini computer. It can distinguish the pre-flash from digital camera and ignore it, then trigger the slave flash rapidly when the 2nd exposure flash from the camera is fired. Now, digital camera users can expand their demand on additional lightings not being limited by the under-powered built-in flash of the digital camera. There are many of these digital cameras that have no receptacles for external flash except for some expensive models that offer their own off-camera flash systems.

The Digital BAREBulb requires no sync.cord, its highly sensitive sensor can respond the master flash 50 ft or more away and will not be affected by the daylight from window. The recycle is rapid, 2 seconds. You can change the built-in reflectors for different illumination patterns, there are 45 degree, 180 degree and 310 degree to choose from. It has 60W/s of flash power, which is mighty in relation to its size. The size is almost the same as ordinary household light bulb.

The Digital BAREBulb fits on any standard household lamp socket that has a E-27 base. It draws very little power from the main and does not generate heat, the light pattern is exactly the same as ordinary light bulb, unless you want to change its illumination pattern.

Digital Camera Slave Flash

60W/s

Above picture was taken on Fold-T-able, 4 Digital Barebulbs were used.
Digital Camera: Olympus C-3000, f 11 1/800 second, handheld, unaltered

Technical Data:

60-3RD Digital Barebulb
Input voltage: 110V or 220Vac
Flash power: 60w/s
Recycle time: 2 sec.
Ready light: Yes
Sync. outlet: Yes, elect. camera safe
Test button: Yes
Screw base: E-27

Color Temperature: 5600K daylight
Flash tube life: 20,000 cycles
Flash duration: 1/1000 sec.
Time delay for digital camera: Yes
Switchable for normal camera: Yes
Changeable reflectors:
Included. 45, 180, 310 degrees

Accessories:

60-3RLK1,2,3 Studio Kit
60-100C Coiled sync. cord
60-500CF 5 color domes
50-401BB 16x16" softbox
10-300 Umbrella/Lamp socket
10-C300 Lamp socket w/clip
10-600S/W 24in. silver umbrella

TRISTAR

Digital BAREBulb kits

Product No. 60-3RLK2

This is an economical lighting kit for digital cameras and conventional film cameras. Two lights are powerful enough to handle many lighting situation. The kit contains 2 Digital BAREBulbs, 2 umbrella lamp sockets, 2 60cm/24in silver umbrellas, 2 210cm/7ft black light stands and everything fits in a hold-all carrybag. The total weight is only 4kg/9lb, and the total length is only 61cm/24". Because of the versatility of the Digital BAREBulb, many lighting requirement can be fulfilled with this simple, yet sophisticated lighting system.

We will include the 5 color filter set free of charge.

Product No. 60-3RLK3

This 3 light kit is most suitable for portraiture photos as one more Digital BAREBulb is added along with a lamp socket and metal clip. Now, the Digital BAREBulb can be positioned high up for hair light, or clipped anywhere that the stand cannot reach. Everything fits in a bag of the same size as the 2 light kit. The weight only 4.5kg/ 10 lb.

We throw in the 5 color filters set and also our exclusive IRX-01* infra-red flash trigger filter free of charge,

*IRX-01 is our innovative product that can be placed over any electronic flash unit and converts it to a infra-Red flash trigger. Totally eliminates the Sync. cord.

Product

- 50-401BB** Magic square softbox
- 60-3RD** Digital Barebulb
- 60-3RLK1** 1 light studio kit
- 60-3RLK2** 2 light studio kit
- 60-3RLK3** 3 light studio kit
- 60-100C** Coiled sync. cord 1m
- 60-500CF** 5 color domes
- 10-300** Umbrella/Lamp socket
- 10-C300** Lamp socket w/clip
- 10-600S/W** 24" silver umbrella
- 10-1004J** 210cm/7' black stand
- IRX-01** Infra-Red flash trigger filter

Special for digital Barebulb. The magic square softbox is 16x16" and fits in round tote bag. Take it out from the bag, pop it up, attach the diffuser and back plate.. and that's it!
