

Fold-T-table™ for Digital Imaging

This is one table that Digital imaging people are looking for; It is foldable, transportable and most important, affordable. The **Fold-T-table** is strong enough to support products up to 4.5kg/10lb of weight. The Model **#70-720DI** has everything that is needed for a packshot table. The translucent material can be rolled up, and to set it up is easy and simple. If you want a color background, just put some color gel over the light underneath, and you can have any color that you want for the background. You can also create some color gradation by placing the light below at a narrow angle. It is included with a low angle tripod for your light underneath. On top of the table, it comes with disposable translucent material to protect the table top from scratches and it also gives more defused, background illumination. There is an optional pair of flexiArm with clips that hold props for you. These arms are to be attached on the side of the table.

In addition, an optional overhead wrap around translucent dome is an important accessories to go with **Fold-T-table**. With this dome, light modifiers like photo umbrella or softbox are not needed. The "dome" is doing a much better job. Save money on those dinosaurs and save time by not stumbling around with them. You can point the light straight onto the dome, from top, side or bottom to illuminate the object. As all the light sources are from the side or the top of the table, maximum 3 dimensional product image can be achieved, and as the light source is diffused, there are no harsh shadows. The **Fold-T-table** has a tiltable back, and has no crossbar under the translucent material to cast shadow on the shooting area, and of course, you can also put color material, muslin backdrop on the table as background if under table illumination is not desired.

(specifications subject to change without prior notice)

Model 70-720DI (without dome)

30"

Optional translucent dome for defused lighting. It is simple to attach to both side of table.

Zig-Zag Steel frame folds up in a small bundle.

Dimension:

70-720DI Fold-T-table

Table top width: 29"/82cm

Table height: 30"/76cm

Table top material length: 56"/142cm

Shipping weight: 20lb/9kg

Optional accessories:

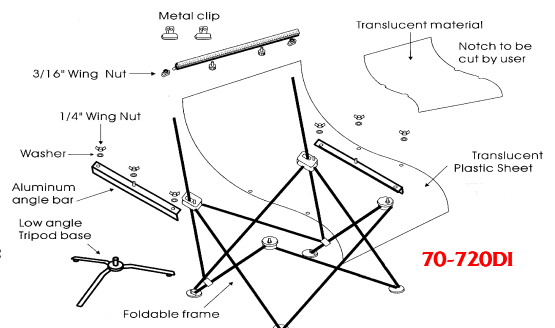

70-720TD Wrap around dome

24"/61cm x 7'/2.1m. x 3/16"/3.5mm thick

Shooting area height when dome is installed:

30"/76cm

70-11 1 pair of FlexiArm w/clips

We make Digital Imaging easy and fun, and

Fold-T-table saves you time, space and money !

Table-Top-table™

for easy Digital Imaging

The **Table-top-table** is a smaller version of the Fold-T-able. It is extremely portable, easy to assemble and you can place it on any real table top. The **Table-top-table** contains fewer parts than the Fold-T-able, yet it is equally versatile. The ingenious dome design enables the wrap-around lighting without the need of softbox or umbrella, thus delivers good quality of lighting on products. The user simply points the light source to the dome and it will diffuse the light beautifully. Product shot by using this table can produce more 3 dimensional outcome.

The **Table-Top-table** can be set-up and knocked down in seconds and everything fits in a small carton box thanks to its flexible, translucent plastic material.

There is a disposable translucent sheet on top of the thick, supportive sheet, this will protect the material from scratches and also diffuses the light more evenly. Of course the user can place any opaque material on top too. Two clips will hold the material in place.

Technical Date:

Total Height: 84cm/33in
Max. height to put in table 58cm/23in
Shooting area width: 50cm/20in
Aluminum frame height: 23cm/9in
Tilting adjustment on back: Yes
Weight support: 4.5kg/10lbs
Table weight: 8.4kg/18.5lb
Shipping weight: 9kg/20lb
Accessories: Pair of Flexiarm to hold props

70-700TKit

1 set Table-Top-table **70-700T**
Including Translucent dome
2 pcs. 7ft Aluminum light stands
3 pcs. Digital Barebulb w/ reflectors
2 pcs. Lamp sockets
1 pc. Lamp sockets with clip
1 sets 5 color domes for Barebulb
1 pc. 40in coiled Sync. Cord
1 pc. Flexiarm
Shipping weight: 16kg/37lb

70-700T

Table-Top-table only

The Digital BAREBulbs are the only light source of this Table-T-able photo

Light pattern can be altered by switching reflectors on Digital BABEBulbs
